Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Schumacher (DE 100 20 491.0) (Schumacher 2002/0175022 will be used as a translation and will be referred to as Schumacher herein). Schumacher teaches a muffler (Figure 1, #1) comprising a casing within which are a gas inlet (6), a gas chamber (pipe branch #5 could be a chamber) and a gas outlet (8), characterized in that a throttling device comprises an open and close member (Figure 2, #14) and a fixture (Figure 4, #26 could be a fixture), and is located in a gas flow route and controlled by the self-energy of the gas flow, and is a pressure reducing valves structure (Page 1 [0018]; Page 3, [0057]), and includes an adjusting device (16) and a throttling device (Figure 2, #14; Figure 4, #26).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2837

2. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schumacher (DE 100 20 491.0) (Schumacher 2002/0175022 will be used as a translation and will be referred to as Schumacher herein) in view of Murray (3,219,144). Schumacher teaches wherein the adjusting device comprises a spring (Figure 2, #12), an energy sensor member (19) and a connection lever (13), which are connected in series. Schumacher fails to teach a manual adjusting device. Murray teaches a manual-adjusting device (Figure 1, #16) (Col. 1, Line 70 – Col. 2, Line 3). It would have been obvious to one of ordinary skill in the art at the time of the invention to combine the apparatus of Schumacher, with the apparatus of Murray to adjust the tension of the spring.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pertinent arts of record relating to mufflers are disclosed in the PTO-892.
